We Get It Done

The new Hampton Inn Window Coverings are somewhat complicated but we know how to do it. We field measure every room for a perfect fit. With our on-time professional install, your property's window coverings will be one less headache you will have to deal with on the jobsite!

What You Need

The new Hampton Inn standard for window coverings consists of stacked roller shades. Mounted at the ceiling over those dual roller shades is a decorative cornice.

We Have 2 Ways To Do The Dual Blackout And Sheer Shade

The easiest way is to do the overlap method. The sheer roller shade are inside mounted in the window casing, and an oversize blackout shade is outside mounted on top of the window. Though it is the easiest configuration for the installer and fabricator, it will not look like it was installed properly.

What we think is the best and what we know guests think is the best, is to inside mount the blackout shade inside the window casing with blackout side channels. On top of that is the sheer roller shade. Guests love the true room darkening of this configuration!

Key Attributes You Are Looking For :

Clean, modern window treatments with creative details can be a major design element in the room. With all solutions, complete blackout must be achieved for guest comfort. Sheer roller shades allow light to enter the room while maintaining privacy for guests. Window treatments provide softness, sound absorption and light control. The window treatment is an opportunity to add texture, pattern and color to accent the room.

Decorative Valance :

Fabric wrapped hard cornice outside mounted at ceiling with appropriate hardware to safely and securely mount to the site conditions. Valance to extend over sides of roller shades.

Dual Roller Clutch Shades:

Our dual roller ClutchShades are made with your choice of fabric. Dual heavy duty bead-chain clutch lift mechanisms allow a shade to be raised and lowered by pulling a side-

mounted bead chain loop with left or right positioning. Standard bead chain is stainless steel. Clutch rollers come with specially designed universal brackets that can be used for all types of mounting. Bead chain loops must be installed with the provided tension device.

ADA Motorization:

Motorized window coverings are required in ADA rooms. A variety of motorization options are available ranging from solar and battery powered lift systems to heavy-duty 110-volt lift systems. Motorized shades can be controlled with your choice of handheld remotes, wall switches, or automation systems.

We Want Your Order!

To quote your order we need a set of floor plans and which of the Hampton room schemes you are using or a copy of your custom design specifications. We will also quote your window coverings for common areas and back of house. We are pros and specialize at making sure the customer is **ALWAYS** happy.
