6. Skilled, fast, and clean installers
7. Hilton approved
8. Competitive pricing

HGI WINDOW COVERINGS FROM WULFF CONTRACT

Hilton Garden Window Coverings:

The Brand Standard Hilton Garden Inn window covering consists of stacked roller shades and decorative side panels with a wood cornice. Next to the glass and inside the casing is a blackout roller shade. On top of that, also inside the casing, is a sheer roller shade. Mounted at the sides on the ceiling are decorative side panels. On top of that is a wood finish cornice mounted on ceiling. To make the room really dark we normally add blackout side channels to the blackout shade. And with Hilton approval we can make custom designed treatments.

We Make Both Hilton Garden Inn Schemes Plus We Make Custom !

CUSTOM HGI

Dual Roller Clutch Shade

Our dual roller clutch shades come with Hilton approved fabrics. The back shade is the blackout and the front is the sheer. Designer fabrics can be selected as well.

ADA Motorization For Your ADA Rooms!

Motorized window coverings are required in ADA rooms. A variety of motorization options are available ranging from solar and battery powered lift systems to 110-volt lift systems. Motorized shades can be controlled with your choice of handheld remotes, wall switches, or automation systems.
